

Aldrovanda vesiculosa

Work in Progress

Water Analysis of the Natural Habitat by Klaus Keller from the Forum

In October 2015, I took a water sample from this location and had it analyzed:

- **pH:** 6
- **KH:** 2
- **GH:** 2
- **Conductivity:** 73 $\mu\text{S}/\text{cm}$

After the Disappearance of Aldrovanda and the Discovery of Goldfish in the Water

The following water parameters were measured:

- **pH:** 7.9
- **Conductivity:** 226 $\mu\text{S}/\text{cm}$
- **Temperature:** 30.4 °C
