

Nepenthes Template

Nepenthes XYZ

Family	Nepenthaceae
Genus	Nepenthes
Clade	Urceolatae
Species	Nepenthes XYZ
Author	Jack
Distribution	Borneo, Sumatra, Malaysia, Thailand, Neuguinea, Molukken, Singapur....
Climate	Lowland - Intermediate - Highland
Space requirement	medium
Growth habit	trailing to climbing
Tolerance	medium
Pitcher size	< 10 cm

Cultivation

Ideal Conditions

Parameter	Suggestion	Notes
Temperature (Day)	22-35 °C	e.g. Many plants grow well between 20-30 °C.
Temperature (Night)	20-25 °C	e.g. Shouldnt fall below 15 °C
Light	100-300 PPF	Information about light habits of the plant
Humidity	80-100 %	Describe the plants preferred humidity conditions and if theres special characteristics about it, like evaporation protection (indumentum) or smthg like this

Substrate & Fertilizing

Parameter	Suggestion	Hinweise
Substrate	List Substrates	Organic or Mineral Substrate preferred
Potsize	eg. bigger or small pot	e.g. the plant roots very wide and has more or less sensitive roots
Watering	Always keep very moist	Maybe natural occurrence habits, peaty swamps, only epiphytic...
Fertilizing	Amount and frequency (eg. 500 µS every week)	mineralic fertilizer
Fertilizer Tolerance	medium to high	e.g. Pitchers get damaged if fertilizing was too much

Unique characteristics

- Bildet Teppiche aus zahlreichen Basaltrieben
- Sehr schnelles Wachstum bei hohen Temperaturen
- Hochkannen werden nur selten gebildet
- In vielen Farbvarianten erhältlich
